

# Summer 2014

On a recent business trip to China, Carl Palmer, President, & Founder of Seychelle Water Filtration made a visit to *the* "Original Charity Handicapped School & Clinic" in Shaoguan, China.

Here Carl is seen visiting with GengGengXiu, a 25 year old woman, who was born with a crippling disease known as Ankylosing Spondylitis – the cause of this malady is

thought to be contaminated drinking water consumed by her mother while pregnant. During his visit, Carl shared his knowledge of how the use of pure lifesaving drinking water can prevent such human tragedies.

Over the past 45 years he has dedicated his life to helping mankind by developing products that improve the health & quality of life by improving the quality of drinking water.

Carl Palmer developed & introduced Reverse Osmosis (RO) for water purification in both homes and offices. He is known as a pioneer in the field of drinking water and development of products for water filtration and purification.

## Summer 2014

---

Now back in the US, Carl is working with various charities to cause sponsorship to support this effort. Another way Seychelle is supporting those in need is by launching a BUY-1 GIVE-1 promotion where by making a filtered water bottle purchase for themselves folks also donate a filtered water bottle to someone in need.

It's a Win-Win!
